In the above-mentioned paper, an erroneous break was introduced in Eq. (10) during the typesetting process. The corrected equation can be found below.

### **Section 3.3**

Equation (10) should be

$$\begin{aligned}\frac{dA}{dt} &= -\zeta_{\text{EFF}}(A(t))\omega_{1e}A(t) \\ &= P_{\text{EFF}}(A(t)) \cdot \frac{\zeta_{\text{STRUC}}}{P_{\text{STRUC}}(A(t))}\omega_{1e}A(t).\end{aligned}\quad (10)$$
