Interactive comment on "Assessment of Wind Turbine Component Loads Under Yaw-Offset Conditions" by Rick Damiani et al.

Rick Damiani et al.

rick.damiani@nrel.gov

Received and published: 14 October 2017

Dear reviewer,

Each channel is separately normalized, but with respect to the field data, and at 0 yaw. This way we have both an indication of the trends (for field and model data) and an indication of how well the model follows the measurements.
