

April 12, 2017

Dear Editors,

Thank you for your comments. We have endeavored to make all changes requested by the chief editor.

The only change we ask permission to reconsider is within the third point. We made the recommended changes to the notation for yaw loss and initial wind direction, however, “pP” we have now used in several past publications, for example, (Gebraad, et al. (2014). “Wind plant power optimization through yaw control using a parametric model for wake effects-a CFD simulation study.” Wind Energy).

For consistency with previous publications, and the notation used within the FLORIS software, we ask that this notation be allowed. Thank you for your consideration.

Paul Fleming
