Interactive comment on "Effect of Atmospheric Stability on the Wind Resource extrapolating models for large capacity Wind Turbines: A Comparative Analysis of Power Law, Log Law and Deaves and Harris mode" *by* Pramod Kumar Sharma et al.

Anonymous Referee #1

Hello,

the article is written in a very poor English which makes it hard to understand and I was often wondering if I was the first person to read it besides the author.

Due to the many flaws in language and presentation of graphics, it was difficult for me to assess the scientific quality of the work.

This article definitely needs major revisions and I would kindly ask the author to have it read by some people before resubmitting it.

Have a good day
