

Interactive comment on “Advanced CFD-MBS coupling to assess low-frequency emissions from wind turbines” by Levin Klein et al.

A. Bianchini (Editor)

alessandro.bianchini@unifi.it

Received and published: 10 August 2018

Dear authors, the Reviewers have posted their comments. The paper has received a general appreciation from them and I also confirm that the quality of your work is high. Please pay particular attention to the suggestions of Reviewers 1 and 2, especially regarding the presentation of the results and the paper length/structure. It is presently a little bit too long and verbose. This can decrease the redability of the study and the impact of the results, which are instead of high scientific quality. Best regards,

Alessandro Bianchini Associated Editore WES
