Received and published: 10 December 2019

Dear Authors,

Thanks for taking the time to answer the reviewer comments. However, the way the responses are organized is not appropriate. It is nearly impossible to check every reviewer’s comment against your response. Could you please split the responses between the various reviewers? They can still be in the same document but organized by the reviewer. If the answer is the same to two or more comments, just write "as in response to RC1 Comment 2", for example.

Best regards, Andrea Hahmann
