Dear authors, thank you for writing this interesting article. I have been kindly asked to review it and to provide my comments. I have done so directly into the pdf document, see the attached supplement (it includes typos and other minor comments). You will find also some general comments, as well as for each section of the paper a detailed description of the comments that are, in my opinion, the most important and that need be addressed.

All the best, Rémi

PS: note that I am not accustomed to making reviews of academic papers. Still, I hope the comments are useful to you and your team.
