Thank you for your review. In response to your comment, I have included the following sentence in Section 4. Conclusion: "Additionally, there is scope to extend the study to develop and explore other protection systems and investigate the effect of stress distribution, stiffness adhesive and viscoelastic properties on the system"

Interactive comment on Wind Energ. Sci. Discuss., <https://doi.org/10.5194/wes-2020-20>, 2020.
