Received and published: 24 September 2020

Thank you, Anonymous Referee #2 for your feedback on Wind Energy Science discussion forum. I understand that the paper does not provide contributions as a scientific paper. After positive feedback from the conference the next step was to input a paper. Due to the level of data able to be published at this time (for reasons of confidentiality), it is not possible to elaborate on the methodologies further and provide more technical input.

Thank you for acknowledging the work as an important topic, and I agree, it will be more appropriate to be published as a report rather than a scientific paper. I will look to publishing as a technical paper in the future if there is sufficient technical data which

C1

is able to be publicly released.
