

## ***Interactive comment on “Pressure Based Lift Estimation and its Application to Feedforward Load Control employing Trailing Edge Flaps” by Sirko Bartholomay et al.***

### **Anonymous Referee #2**

Received and published: 6 November 2020

Generally a good article, with insights on the mechanisms of utilizing pressure based lift estimation for load control with active flaps. More details on many of the aspects of the experiments and modeling can improve the quality of the article. Detailed comments are included in the uploaded pdf file.
