

1 Response to the editor

- I want to congratulate you on satisfactorily carrying on all the revisions recommended by the two referees.
[We would like to thank the associate editor for the kind words, and for their help throughout the submission process.](#)
- I want to suggest that you make the model code more accessible to possible researchers and generate a DOI by, for example, using GitHub and Zenodo. It is not a requirement of WES but, in my opinion, is a valuable asset for your research and the community.
[We agree with the suggestion, but we are currently not able to make the code open-source. However, we are working towards this, and an open-source version is planned to be released by the end of the year. We added a line in the *Code and data availability* section on line 486 to mention this.](#)
- ..., subject to minor revisions, including revising all references; many are incomplete and lack DOIs. Also, the data source of the ERA5 data is missing in the manuscript; please check the data acknowledgement section of the dataset.
[We would like to thank the associate editor for noticing this. The reference list has been corrected, and a reference to the ERA5 data source has been added on line 428 and in the *Acknowledgements* section.](#)
