Please also note that the caption for Figure A1 is set for a two-column format i.e. upper and lower figures. If the manuscript shall be published using a single column-format, then the caption for Figure A1 should be "Friction velocity computed using the eddy covariance method with the double rotation method compared with the Klipp method. The left panel considers only  $|z/L| \leq 0.1$  and the right panel considers  $0.1 < |z/L| \leq 2$ ."
