

Dear Julie,

Thank you for editing our paper and providing comments for improvement. We have implemented your suggestion by removing the Future work section and instead added a paragraph at the end of the Conclusion section with considerations for future work.

We have also provided a DOI for HAWC2 files: 10.11583/DTU.21717524 under 'code and data availability'. It will become active after the paper is published because one of the fields in this item must link to the DOI of the actual publication. There is a draft link to the DOI at: <https://figshare.com/s/4601e4ef23a0e1d020bc>

Best regards,  
Ásta, also on behalf of the co-authors
