Dear Editor and Reviewers,

The authors are thankful for the opportunity to publish the manuscript titled "Knowledge Engineering for Wind Energy" as it was originally presented. We are very grateful to the reviewers for the time they took and the effort they expended in reviewing the paper.

Even though no changes were requested on the part of the reviewers, minor edits have been introduced to the manuscript compared to the reviewed version based on community feedback. These can be summarised as follows:

- Overall: minor editorial / typo changes.

- Page 25, lines 680-685: the description of the IRPWIND project has been improved and a link to the project has been provided.

- Page 30, line 749: a reference to the relevant review of the ontologies for units of measurement has been added.

- Page 36, lines 858-861: recommendations relevant to automation have been made more clear.

Changes made to the manuscript are rendered clearly visible in the supplementary file, where new text passages are underlined and deleted text is ~~strikethrough~~.
