

WES-2023-56

December 17, 2023

Note to Editor:

Thanks for accepting this paper. In handling this final version, please note

1. All the equations are done in Microsoft Word. Thus, the units appear in italics.
2. The abbreviation GW for gravity waves is defined several times in the text. GW is never used in this paper to mean GigaWatts.
3. I corrected the symbols for Newtons (N) and Pascals (Pa)
4. I slightly shortened Table 2 to make it more readable.
5. There are four figures in the paper. Each figure has two parts. I have submitted the figures as png files, combined into a ZIP file.
6. The reference list format is in pretty good shape but two references (Hansen 1983 and Gribben 2019) are non-standard.

I hope you can repair any mistakes in formatting.

Thanks

Ron Smith
