General Comments

My comments have been addressed in a satisfactory manor and I believe the paper is now ready for publication.

However, I have found some minor editorial changes:

l.118: the effect they have [on] the turbine

Table 3: column 3, row 3, it says the pulse modulates the wake depth, I think it should say wake width

l. 251: missing unit of the amplitude

Figure 3, caption: it should be $z/D=0.625$

Figure 4: same as figure 3.
