

We thank both the editors and reviewers for considering this manuscript. Below, editor comments are in black and **our responses are in blue bold.**

We thank both editors for their appraisal of this work. We have made the requested italicization modifications within the equations, text, and figure labels and hope that this updated manuscript aligns with formatting expectations.

Dear authors

I am happy to follow the recommendation by the Associate Editor and suggest publication of your manuscript subject to technical corrections. Please consider the requested correction carefully. Thank you for choosing Wind Energy Science for publishing your work.

Best regards
Julia Gottschall

Dear authors

I have reviewed your latest responses to the review and the requested corrections to your manuscript. I am pleased with your implementation and am ready to accept your manuscript for publication in WES.

I have one final technical correction. The terms RMSE and EMD (there may be others) are abbreviations, not variables; they should not be italicised in the equations or the text. Please correct and resubmit your manuscript.

I take the opportunity to thank you for publishing in WES.

Best regards,
Andrea Hahmann, WES associate editor.
