

You used an appendix numbering (see "8. Appendices" at <https://www.wind-energy-science.net/submission.html#manuscriptcomposition>) for the supplement file. As we differentiate between appendix material (part of the main manuscript) and supplementary material (provided as separate file), please renumber the supplement figures and tables to "Figure S1", "Figure S2", etc. , as well as "Table S1", "Table S2", etc. (please see "Supplements" at <https://www.wind-energy-science.net/submission.html#assets>). Alternatively, you may include the appendix material with the current numbering after your last regular section and delete the supplement file.

Response: All appendix numbering for figures and tables have now been adjusted to the requested format (Figure S1,S2,S..., Table S1,S2,S...". The appendix has been saved to include a zip folder of all figures, and word and pdf versions.
