Re: Submission of final revised manuscript for WES-2025-58, "Frequency-domain modeling of floating wind arrays with shared mooring lines"

Dear Editor,

In this final revised manuscript we have corrected the type noted by a reviewer (an equation reference number was wrong) and also made one correction to a number in Table 1 (we mistakenly had listed an older version of the clump weight mass). We believe everything is now ready for publication.

Our thanks to you and the reviewers for guiding the paper to this point.

Best regards,

Matt Hall
